## 1. Introduction

### 1.1.Purpose

The purpose of this document is to present a detailed description of the **eBook Application**. It will explain the purpose and features of the system, the interfaces of the system, what the system will do and the constraints under which it must operate. This document is intended for both the stakeholders and the developers of the system. **This document will be the base for confirmation of the delivery of the product as per the original requirements discussed and agreed by both the parties i.e. customer and vendor.**

### 1.2.Scope of the project

The scope of the project includes followings

- Functional specification document to describe the total system in low level
- UI Design of the total system including interface for users.
- Development of all functional requirements.
- Setting up the system on live server in ready for use condition

### 1.3.Glossary

Customer/Client	Evelyn Ng
Vendor	Refer to the development company – Octal Info Solution
Database	Collection of all the information monitored by this system.
Field	A cell within a form.
Software Requirements Specification	A document that completely describes all of the functions of a proposed system and the constraints under which it must operate. For example, this document.
TL	Team Leader

## 2. Functional Requirement specification

### 2.1.Brief Description

eBook Web and Mobile Application Project an application where users can explore eBooks offered according to their preferred Genre, buy them online and enjoy reading using smart features of the application.

Applications will have three types of users who will be interacting with the application with following functionality.

1. **Customer (Web and Hybrid Mobile App):** They will be able to search and browse ebooks and can buy them
2. **Vendor (Book Owner) Website:** Vendors will be able to manage eBook .
3. **Administrator:** Owner of the application with a web based content management system (Web based panel)

### 3. User=Customers (Web and Hybrid Mobile App - iPhone & Android)

#### 3.1. Splash Screen

**Feature List Ref (Task ID) :**

This will be the landing screen of the application

##### 3.1.1. Design

##### 3.1.2. Business Rules

- This will be the landing screen of the application and will display the logo & the tagline of the business
- The screen will be displayed for 2-5 sec, and then redirected to other screen Automatically
- Logo and Tagline will be provided by the client.

#### 3.2. Registration Screen

**Feature List Ref (Task ID) :**

This will allow user to get registered at application by providing certain details;

##### 3.2.1. Design

##### 3.2.2. Business Rules

- Under this screen user will be asked to fill the following details to get register on the app
  - Name
  - Email ID
  - Password
  - Confirm Password
- After filling above details, the user needs to click on “Submit” to register; after that, the user will proceed.
- OTP Verification: In verification, User will get the OTP code at their email entered at the time of registration. In which, User will redirect to OTP verification page where they will see the following options:-
  - Enter OTP (Textbox)

- Submit
- Resend OTP (Link) - If OTP is not received, then user will tap on the link to get the OTP again

### 3.3. Login Screen

**Feature List Ref (Task ID) :**

Registered User would be able to login into the application by providing the right combination of login credentials.

#### 3.3.1. Design

#### 3.3.2. Business Rules

- Log in screen will have following Fields
  - Email ID
  - Password
  - Login Button
- There will be standard option of Forgot Password
  - It will send the link on registered Email ID to reset the password
- Create a new account.
  - On Tap of this button user will redirected to the Registration screen
- Skip : Users can Skip the Login and can browse the books but login is required to place the order and see account related features.

User can skip login and browse Product Catalogue. The list of ebooks that they can browse or view will depend on their country location so it is better to check the country where they open the browser. **Octal >> ok** User can skip login, agree. Yes country will be picked up by GPS for Non-registered User, and for Registered user country will be what they provided while registration. OR during checkout or adding books(for Vendor) registered user is a must.

### 3.4. Home Screen

**Feature List Ref (Task ID) :**

This will be the landing screen which will allow user to check certain details under specific sections

#### 3.4.1. Design

#### 3.4.2. Business Rules

- This will be the landing screen which will allow user to check certain details under specific sections
  - Search Bar
  - Banners (Manageable by backend)
  - Categories of books (As per additional scope) : List of categories will be available , it will contain following:
    - Name
    - Based on selected category , book list will be available
  - Popular eBooks
  - Recommended eBooks
  - Burger Menu

- **Search Bar:** There will be a search bar on the top of the screen which will allow user to perform keyword search for desired
  - eBooks
  - Author Name
  - ISBN Number
- Once users enter the keyword they will able to view popular books with basic details
- **Burger Menu:**
  - eBook Listing
  - Transaction History
  - My Account
  - Contact Us
  - Logout

### 3.5. eBook Listing Screen

**Feature List Ref (Task ID) :**

This screen will list the eBooks matching the search criteria:

#### 3.5.1. Design

#### 3.5.2. Business Rules

- This screen will list the eBooks matching the search criteria:
  - eBook Title
  - Image – Default
  - Category/Sub-Category
  - Vendor Name (Optional)
  - Author Name
  - **Price (include GST) in SGD - Considered, Yes Vendor will enter price including GST.**
  - Discount Price including GST (SGD): Discount will be able to manage by vendor over the system
    - If discount price not available then system will not show discount price
  - View Details
  - **Filter:**
    - By Category Only
  - **Call To Actions:** User would be able to
    - View details of selected eBook
    - Mark as Favorite
    - Add to Cart
  - The results will be updated in same view
  - **Assumption :** Genre and category is same

### 3.6. eBook Detail Screen

**Feature List Ref (Task ID) :**

This screen allows user to view ebook details.

### 3.6.1. Design

### 3.6.2. Business Rules

- Once users click to details they will able to view following information: This screen will show the details of the selected eBook
  - eBook Title- Book Title, Description, Author/ Publisher Name can be in Chinese.
  - eBook Description
  - Image(s)

  - After successful payment order will move to transaction history.
  - Respective vendor will get notified about same
  - Customer's ebook will be downloaded to the customer's side after payment.
- Assumption:** Assume that vendor will provide the Epub file to admin and admin will provide link of ebook (If adobe DRM process applicable in case of DRM) in admin section. Customer will download the file using that link and opening / showing file is not included here.
- Customer will be to download the file using that link and opening / showing file is not included here.
- The purchase records in managed order in vendor section and will not notify to Vendor.

## 3.9. Transaction History Screen

Feature List Ref (Task ID) :

This screen will show all the transaction history (orders) which has been placed by the user so far.

### 3.9.1. Design

N/A

### 3.9.2. Business Rules

- Screen is divided in two tabs : Past Order & Latest Order
- Past Order
  - Order ID
  - Date of Order
  - List of eBooks ordered
  - Amount Paid
  - Order Status (Completed)
  - Email request for refund(customer need to send email outside application and admin can take action as per analysis)
- Latest Order
  - Order ID
  - Date of Order

- List of eBooks ordered
- Amount Paid
- User will email directly to admin, no refund button on the application.

### 3.10. My Account Screen

**Feature List Ref (Task ID) :**

This screen will enable user to manage his profile and other details.

#### 3.10.1. Design

N/A

#### 3.10.2. Business Rules

- This screen will enable user to manage his profile and other details.
- Profile Details
  - Name
  - Email ID
  - Mobile No.
- Favorite Book: On this module, users will able to view all the favorite book
- Change Password
- Settings
  - Notification (ON/OFF)
- Notifications:
  - User will receive following notification:
  - Payment Successful/Failure
  - New Book Upload
  - Admin notification

### 3.11. Static Screen

**Feature List Ref (Task ID) :**

This screen allows users to view static information of the application.

#### 3.11.1. Design

N/A

#### 3.11.2. Business Rules

- User can view the following such as: -
  - Terms & Conditions
  - Privacy Policy
  - About Us
  - FAQ's
  - Help/Contact Admin (Via email)

## 4. User=Vendor (Book Owner) - Website

## 4.1. Registration

**Feature List Ref (Task ID) :**

Vendors can register him to the system to offer his service.

### 4.1.1. Design

### 4.1.2. Business Rules

- User will sign up into the application by filling some details such as:
  - Name
  - Email ID
  - Password
  - Confirm Password
- After filling above details, user needs to click on “Submit” to registration after that, user will proceed.
- OTP Verification: In verification, User will get the OTP code at their email entered at the time of registration. In which, User will re-direct to OTP verification page where they will see the following options:-
  - Enter OTP (Textbox)
  - Submit
- Resend OTP (Link) - If OTP is not received, then user will tap on the link to get the OTP again

## 4.2. Login Screen

**Feature List Ref (Task ID) :**

Vendors will be able to login from this screen

### 4.2.1. Design

### 4.2.2. Business Rules

- If the user has already Existing account, then they can able to sign In.
- Log in screen will have following Fields
  - Email Address
  - Password
  - Login Button
- There will be standard option of Forgot Password
  - Once the user has clicked on the screen to forget the password, it will display a pop-up where users can submit the email id, after submitting the email address, users will receive a link by email. Once users have clicked on the email ID, they will be able to reset the password .

## 4.3. Dashboard/Home Screen

**Feature List Ref (Task ID) :**

This will be the landing screen for the Vendors

### 4.3.1. Design

### 4.3.2. Business Rules

- Vendor will see following statics:
  - **Total eBooks:** Once users click on a total eBook they will be able to view the total number of eBook with details.

  - IOS Version Supported : iOS 13 and above (Latest Stable version of 13)
- Android OS Version and Device Supported
  - Resolution supported : 480 x 320; 800 x 480; 1280 x 720; 1920 x 1080, 2560 x 1440, 2880 x 1440, 2960 x 1440
  - Device tested on : Samsung S2/S3/S5/S7/Note2, Sony Xperia, HTC Desire 1, Moto G2/G4, Lenovo K4 Note, Google Pixel 2 & Huawei Nexus 6P
  - Supported : Android 5 and above

### 6.2. Web Based Backend Development

- Design: PHOTOSHOP
- Front End: Laravel/ React.JS
- Client Side Script: JavaScript, jQuery
- Server Side Script: PHP/ Node JS
- Database: MySQL/ Mongo DB

## 7. Assumptions/Suggestions:

- Client will pay for 3rd party tools/systems used in this project. The 3rd part tools/system are limited to the following:
  - Apple / Android Store details
  - Live server hosting
  - Payment Getaway
- Application Languages
  - English
- App will be developed in Portrait and Landscape view.
- Standard design template will be used for Admin Panel
- Octal IT Solution Pte Ltd. is responsible for the iOS/Android versions, which are currently available on iTunes . If there are any versions released after that, Octal IT Solution Pte Ltd. does not provide any guarantee for that.

### Additional Points:

Following are the additional points:

1. Adobe DRM with PDF – no editing required
- 5.6.2: Add new eBook
- Created from Admin side, we also accept PDF file format.

- a.
2. Non-DRM Approach – If User has purchased eBook, then only they will be able to download Add new eBook  
Adobe DRM: Yes or No  
For Non-DRM: Admin will upload sample file but User cannot download it  
Multi Currency – USD, SGD(we will set both the currencies)  
Multi languages – Project will be in English only but eBook can be in any language which vendor will upload.
  3. Manage territorial rights as per country: In case of **Non registered user**, If User allow the location, app will use that, if User do not provide the location, app will use List of countries from the app which is provided by client(Evelyn) . **For registered user** – app will take from country selected at the time of registration.
  4. Bookshelf – Add to favorite and Bookshelf only keep paid eBooks
  5. Sample file – For Non-DRM Process only Admin will upload manually from Admin section but User is Not allowed to download the same(Only preview)
  6. **Admin can also add new eBooks and Vendors: (Admin needs to register as a Vendor to publish eBook)**

#### 5.6.2 Add new Vendors

- a. Can set different Royalty Percentages for the new Vendor added by admin

### ACCEPTANCE OF SRS DOCUMENT

I have gone through the SRS document of the project “eBook Application” “SRS\_eBookApplication\_V3.0.docx” Page “1 to 24” this document and its contents are true representative of the entire project. *Any other discussions on public forum /chat/ voice call but not mentioned in this document are not part of the project\**.
