## —
## Skills

Proficient in Python programming language. Highly skilled in web development using Wordpress, React, HTML and CSS. Have great deal of experience in C/C++, well versed in javascript. good understanding of SQL. Some experience with Neural Networks and Deep Learning.

## —
## Projects

### BTP - Neural Network Analysis
This project aims to come up with a better method for neural network analysis which would be faster and more accurate than the previous models available like DeepXplore, Deephunter etc. I did research on the previous models and analyzed the drawbacks in them and came up with better solutions.

### Deepfake Detection
This is a fake news detection system that uses a combination of machine learning, audio processing and natural language processing to distinguish fake news from real on the basis of source and content.

## —
## Experience
